

Keep out of reach of children

KiwiMate

Biogro Certified Solid Humate.

This is New Zealand's locally sourced high

quality Humate. Ideal for bulk spreading onto

pasture. Humates also contain slow-release Humic and Fulvic Acids, which are renowned for their capacity for nutrient release and improving soil structure while helping to maximise the benefits of applied fertilisers. There is general consensus that 1 ton of humate equates to approximately 20 tons of compost. Humate is the world's oldest form of compost.

Apply between 100 – 300 kilos per hectare.

Available in 25kg, half ton, 1 ton bags and bulk
