2. Add other chemicals, if any.
3. Fill tank with balance of water.
4. Add correct amount of fertiliser.
5. Agitate adequately to mix.
6. All analysis w/v.
7. Shake well before use.

Check compatibility with orthophosphate, high potash suspension , and chemical mixtures.

Available Sizes: 500ml, 1L, 5L, 20L

Lawn Fertiliser is like getting a lawn care kit in a bottle. This liquid fertilizer contains a blend of quality, lawn food supplements, trace elements, seaweed plus soil activators and liquid humus. It's great for a quick lawn green-up since the nutrients are absorbed by the leaves within minutes. Avoid the messes and chemical hazards of harsh fertilizers.

With liquid lawn food treatments, nutrients are taken in directly through the leaves, which means faster, more efficient absorption of the fertilizer. Liquid Lawn Fertilizer helps grow greener, more vigorous lawns from Spring to Fall by supplying plant nutrients in combination with Humic Acid for more complete nutrient uptake (less fertilizer waste) and soil activators to stimulate natural soil organisms.
