

MicroMix-Hort

MicroMix-Hort Powder is Protein base non-chelated micronutrient mixture with micro mixing technology. Ideal for horticultural crops like fruits, vegetables and flowers.

Nutrient Content weight by weight (Min.)

1. Fe 3.4 % w/w
2. Zn 5.0 % w/w
3. Cu 0.5 % w/w
4. B 0.5 % w/w
5. Mg 1.2 % w/w

Benefits

- Micronutrients in chelated form, helps quick & easy absorption by the crop
- Plays an active role in respiratory function
- Helps to overcome stress condition
- Helps to boost up energy metabolism by the plant
- Provides readymade & easily assimilable source of nutrition
- Helps in pollination & fruit formation
- Helps to activate phytohormones & other growth substances in the crop
- Boosts the photosynthetic activity and increases chlorophyll content.
- Useful maximize growth & yield by correcting micronutrient deficiencies of crops.
- Compatible with most insecticides & Fungicides, except those with alkaline reaction.

Application Rate

Foliar Spray: 25g mix with minimum 10 liters of clean water . Two sprays are recommended at peak growth stages.

May be applied to soils in irrigation or sprinkler systems, or applied as a foliar spray.

Check compatibility with pesticides or liquid fertilizer before full scale tank mix.

Caution

- Avoid contact with skin & eyes
- After handling, wash hands with soap & water thoroughly
- Store away from direct sunlight & moisture.

PESTICIDE COMPATIBILITY: compatible with most insecticides, herbicides, miticides, fungicides and foliar fertilizers. It may be incorporated into existing spray programs. Add to the water prior to the pesticides. Perform jar compatibility test prior to full scaled tank mixing when using previously untried combination.

With Holding Period: 5 days / 5mm rain

Available Sizes: 500ml, 1L, 5L, 20L
