Compond

Heavy
Duty
Acid
Sanitiser

Contains 180gm/ltr of Phosphoric acid, 125gms/ltr Sulphuric acid and Sanitiser

Approved By: **Asure Quality** and MAF. Ref. h2462

UN 1760
Hazchem 2R
Class 8
Packing Group II
CORROSIVE
PHOSPHORIC ACID

BENEFITS

- A powerful blend of two acids and a sanitiser
- Controls Iron and removes hard water deposits
- Removes milkstone, scales and kills thermoduric bacteria
- Low – Medium foam, dissolves and dispenses quickly

Description

An excellent cost effective acid cleaner with quaternary ammonium chloride sanitizer for cleaning stainless steel milking machine and vats.

Form: Clear Red liquid

Foaming: Low - Medium

Biodegradable : Yes

HOT WATER 10 Ltr	0.15% STRENGTH	15mls compound
COLD WATER 10 Ltr	0.30% STRENGTH	30mls compound

Important: Rinse with clean water to minimise acid residues afterwards before next milking. **BSL's Compond** may be used to clean at all temperature - a cold water wash should be used in support of a hot wash (85 C) minimum as part of a daily routine. Weather Resistance formula, can be used at all temperature and watre type.

Milk Machine Cleaning

For jetter and re-circulation cleaning use wash solution volumes as required by NZCP1: Code of Practice for the Design and Operation of Farm Dairies i.e. 10 litres of wash solution per set of cups

Bulk Milk tank Cleaning

Use wash solution volumes for bulk milk tanks as required by NZCP1: Code of Practice for the Design and Operation of Farm Dairies i.e. 2% of vat volume with a minimum of 120 litres

Observe recommended good milking practice guidelines for cleaning. With all cleaning systems, a minimum of 2 hot alkaline wash per week using **BSL's - Baseflow** is recommended to prevent protein build up.

Compond Table For Use Bulk MilkTank (Farm Vat)

Tank Size (Litres)	Wash Volume (Litres)	Compond (mls)
3400	120	180
4500	120	180
5700	150	250
6800	150	250
9100	200	300
12000	250	375
14000	280	420

Hot water volumes for vat wash must be 2% of vat volume with a minimum of 120 litres
