

pH adjuster

Analysis:

Calcium (Ca) 8.1% w/v

For use in certified organic production as a fertilizer for foliar, fertigation and soil applications to supplement calcium levels in agricultural crops.

Directions for Use (Use only as Directed):

- Avoid foliar application in poor drying conditions such as very high humidity, heavy dew set or continually rainy weather.
- Do not foliar apply when ambient temperatures are expected to exceed 85°F before application completely dries on foliage.
- **Aerial application**– minimum of 20L of water/acre; **Ground sprays:** Dilute sprays – minimum of 150L of water/acre.
- Exercise caution when applying to any crop during bloom, as many factors can affect fruit set and final fruit quality.
- pH adjuater is compatible with most agricultural chemicals and nutrients. Should be applied in conjunction with tissue and/or soil analysis.
- Care should be exercised when applying to chlorophobic plants.

Apply no more than 10L/ha/ application. Apply no more than 25L/season. Always apply toward the end of an irrigation cycle.</p>

**Application rates vary according to specific crop requirements, management objectives, soil nutrient availability and/or environmental conditions. Lower rates are recommended for general crop maintenance or when applying multiple times per season; higher rates are recommended when applying a minimum number of applications to crops that require repeat applications, or where more severe deficiency is present. Higher volumes of water should be used for higher rates of fertilizer. For application timing charts, please consult a product manual.
